

SUSTAINABLE FILTRATION SYSTEM

In today's world, plastic waste is a growing concern and reducing it shouldn't come at the expense of performance or cost. The new SPECTRUM Serve refillable housing is designed as the next step beyond traditional inlines, delivering superior filtration while cutting waste. Built to perform better and capable of tackling a wide range of contaminants, it offers a smarter, more sustainable solution for any setting.

Compatible with six interchangeable cartridges, including optional phosphate for scale control, this flexible system is ideal for vending machines, water coolers, coffee stations, and drinking water outlets in hospitals, gyms, and other light commercial environments. Cartridges offer a range of contaminant removal, including chlorine, heavy metal and chloramine.

FEATURES & BENEFITS

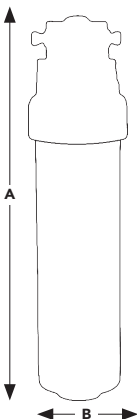

- **Future of Inline Filtration:** Better performance, less plastic waste, lower price.
- **Reduces Plastic Waste:** Up to 80% less waste without sacrificing performance (over the lifetime of the housing).
- **6 Cartridge Options:** Offering wide contaminant removal choices.
- **Simple Maintenance:** Built-in shut off valve and easy change-out.
- **Suitable For All:** From homes to light commercial applications.

MATERIALS OF CONSTRUCTION

- O-ring: EPDM
- Spring: 304 Stainless Steel
- Filter Housing Head: Polyoxymethylene (POM)
- Filter Housing Cap Body: Polypropylene
