HOME

# SPECTRUM HOME

**Enjoy Cleaner, Safer Water Every Day**

Upgrade your home with this **SPECTRUM** range - designed to enhance your daily life with cleaner, safer, and better-tasting water.

From protecting your appliances and improving energy efficiency to reducing impurities and limescale, our innovative solutions tackle common water quality concerns with ease. Whether it's for drinking, cooking, or everyday household use, **SPECTRUM HOME delivers the reliability and performance you can trust.**

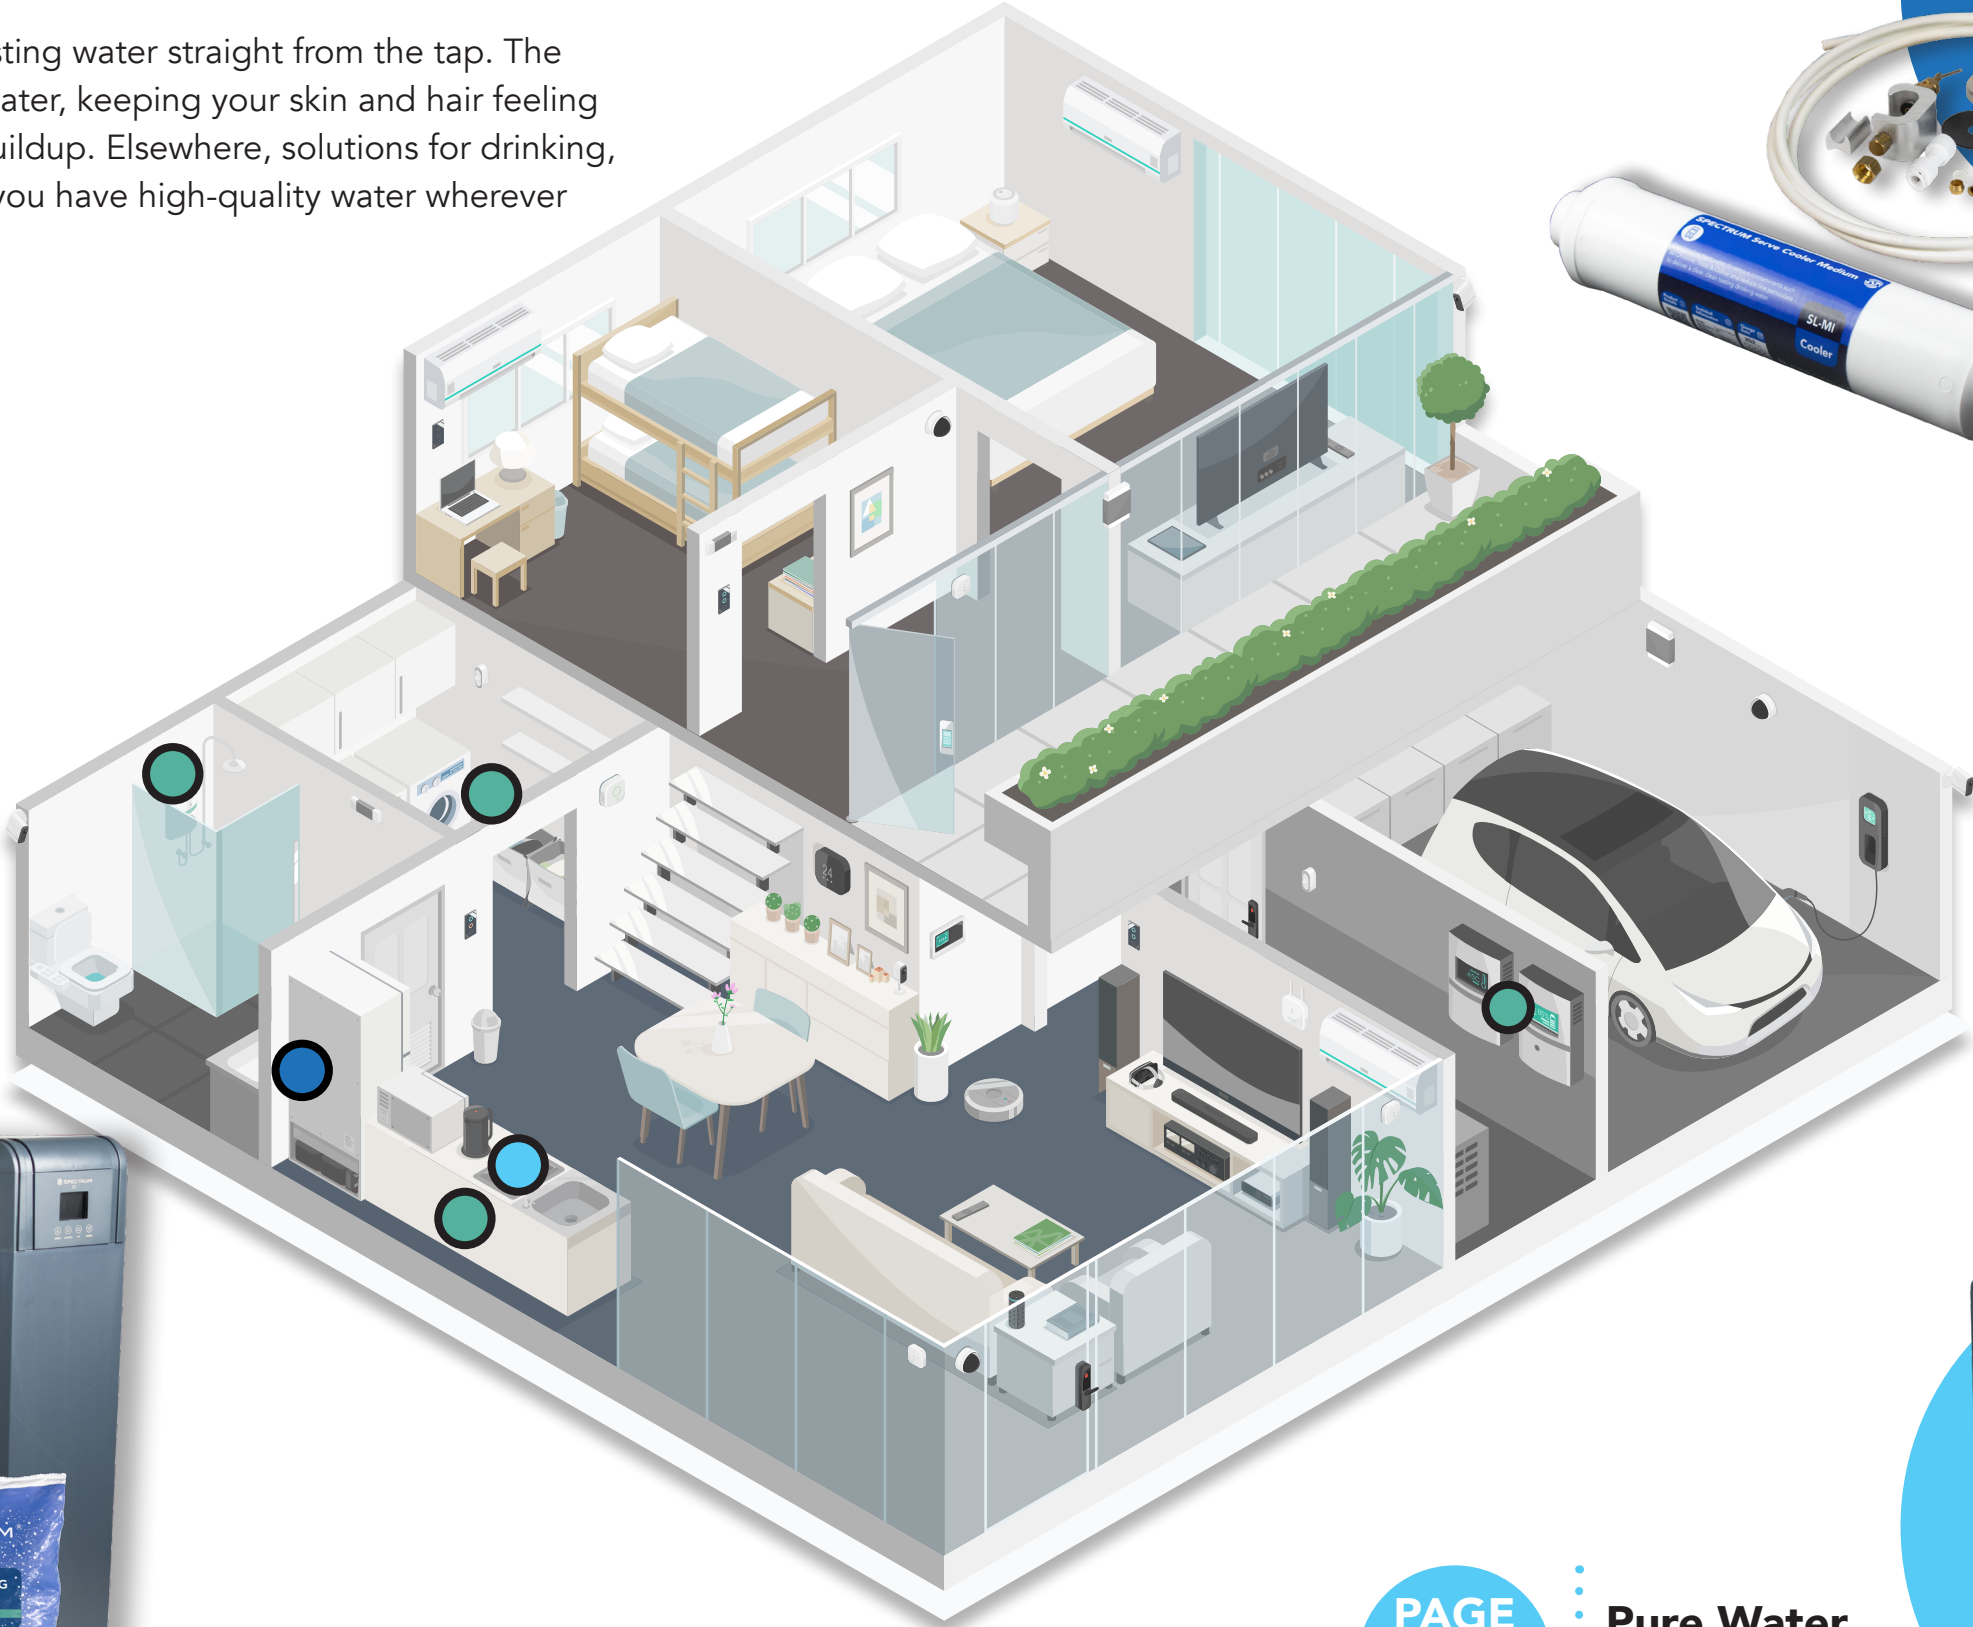

# WATER TREATMENT AT HOME

Discover how SPECTRUM HOME transforms your water for a cleaner, healthier home. Wherever water flows, SPECTRUM HOME ensures it works better for you.

In the kitchen, enjoy pure, great-tasting water straight from the tap. The bathroom benefits from softened water, keeping your skin and hair feeling smooth while reducing limescale buildup. Elsewhere, solutions for drinking, cooking, and everyday use ensure you have high-quality water wherever you need it.

## SPECTRUM SOFTENERS

System requires salt for regeneration

Luxury of cleaner, softer water at home

- 🔒 Protect your home
- £ Save money
- 💚 Live healthier

### DID YOU KNOW?

A water softener  
can save up to **£500**  
per household per year

### What does a softener do for you?

#### Save Money

An investment that pays for itself over time, a water softener helps reduce costs and adds lasting value to your home.

#### Protect Appliances

Prevents mineral buildup, reducing wear and extending the lifespan of your appliances, keeping them running efficiently for years to come.

#### Healthier Hair & Skin

Soft water is gentle on your skin and hair, preventing dryness and irritation while leaving them feeling smoother, softer, and more hydrated.

#### Less Soap Used

Soft water creates a richer lather, allowing you to use less soap, shampoo, and detergent while still getting a deep, effective clean.

#### Cheaper Heating

By preventing scale buildup, a water softener improves heating efficiency by up to 12%, reducing energy consumption and lowering your utility bills.

#### Cleaner Home

Keep your home spotless, clothes brighter, glassware free of streaks, and no more soap scum or limescale buildup on surfaces.

### Why SPECTRUM SOFTNERS?

#### Multiple Sizes

Available in three sizes, ideal for different household sizes

#### Product info

#### Digital Display

Programming and control with digital warnings and touch buttons

# PURE AND HIGH PERFORMANCE

## SPECTRUM SALT

Food grade quality PDV salt

Protect your home

Save money

Live healthier

### What does salt do for your Softener?

#### Protects Your System

Salt helps maintain the softener's resin beads, protecting the unit from reduced performance and extending its lifespan.

#### Assists Regeneration

Salt is used during the regeneration cycle to recharge the resin beads, allowing the softener to continue removing hardness minerals from your water.

#### Prevents Limescale Build-Up

Salt helps your water softener remove hardness minerals such as calcium and magnesium, preventing limescale from forming in pipes, appliances, and heating systems.

### What types of salt are available?

#### Block

Designed for modern cabinet style softeners, offering ultimate convenience

#### Tablet

Most popular choice for domestic water softeners

#### Granular

Free-flowing option commonly used in older or industrial water softeners

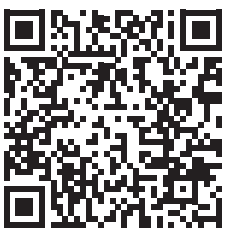

### Why SPECTRUM Salt?

#### EN973 Type A

SPECTRUM softener salts are produced to EN973 Type A standards, delivering consistent purity and performance across all types

Food Grade  
Food grade quality PDV salt making it safe for human consumption

# PURE WATER

## SPECTRUM Z1

Benefit from RO water at home

Purified water

Better tasting water

Removes PFAS

### DID YOU KNOW?

Bottled water can cost  
**£1460** per year for  
the average 4 person family

### What does an RO system do for you?

#### Healthier, Safer Drinking Water

Removes contaminants for cleaner, fresher-tasting water, free from chlorine, bacteria, and heavy metals.

#### Cost Savings

Eliminates the need for bottled water, saving money while providing unlimited purified water.

#### Convenience & Unlimited Supply

Pure water on demand, straight from the tap - no waiting, refilling, or hassle.

#### Better for Cooking & Beverages

Enhances the taste of tea, coffee, and food by removing impurities that affect flavour.

#### Space-Saving & Discreet

Neatly fits under the sink, freeing up counter space and keeping your kitchen clutter-free.

#### Environmentally Friendly

Reduces plastic waste and carbon footprint by eliminating single-use bottled water.

### Why the SPECTRUM HOME Z1?

#### Space Saving

Fits perfectly under your sink and has locking mechanisms for easy cartridge change-out

#### Advanced technology

4 stage system:

1. Pre-filter for sediment removal
2. Carbon for reduction of CTO and PFAS/PFOA
3. RO for TDS reduction
4. A further carbon for great tasting drinking water

# BOTTLED QUALITY WATER

## SPECTRUM INLINES

Perfect for fridges and coolers

- Better tasting water
- Healthier water
- Protect your fridge

### What does a fridge filter do for you?

#### Cleaner, Safer Drinking Water

Removes chlorine, heavy metals, and contaminants for fresher, healthier water.

#### Better-Tasting Ice & Beverages

Eliminates impurities that affect the flavour of water, ice, coffee, and other drinks.

#### Convenient & Always Available

Filtered water and ice on demand, straight from your fridge - no need for refilling.

#### Protects Your Fridge & Ice Maker

Prevents sediment buildup, extending the life and efficiency of your appliance.

### Why choose SPECTRUM INLINES?

#### Easy to install

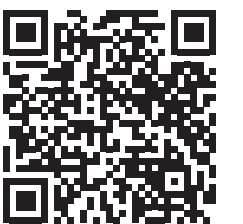

Quick connect fittings make for easy installation and changeout

Convenient size  
Suited for all kitchen spaces

### DID YOU KNOW?

A fridge filter can save  
**24,000+** plastic  
bottles from being produced  
a year

## SPECTRUM REFILLABLE HOUSING

The future of home filtration

- Easy to use
- Healthier water
- Environmentally & financially friendly

**DID YOU KNOW?**  
Refillable housings provide up to **90%** saving on plastic compared to traditional inlines

### What does a refillable housing do for you?

#### Cleaner, Safer Drinking Water

Refillable housings can be paired with a wide range of filtration media to help reduce unwanted contaminants, improving the quality and safety of your drinking water.

#### Better Tasting Drinks & Ice

By reducing chlorine, odours and other taste-affecting impurities, filtered water can enhance the flavour of your water, tea, coffee and ice.

#### Convenient & Always Available

Enjoy filtered water straight from the tap whenever you need it, without the inconvenience of buying, storing or carrying bottled water.

#### Space-Saving Design

Unlike larger under-sink filtration systems, refillable housings have a compact footprint, making them ideal for installations where space is limited.

#### Reduce Single-Use Plastic

By switching from plastic bottles to filtered tap water, you can significantly cut the amount of single-use plastic your household consumes.

### Why the SPECTRUM Refillable Housing?

**Space Saving**  
Easily fits under a sink or in a cupboard

**ECO FRIENDLY**  
Reduces plastic usage by 90%
